PROFESSIONAL EXPERIENCE

📍 Corso Vinzaglio 33/A
10121 Torino (TO) Italy

LANGUAGE SKILLS

Science communicator

2017 - 2022

Professor of Mathematics and Physics

L.S.S. Ettore Majorana, Torino
I.S.S. Curie-Vittorini, Grugliasco
Lindbergh Academy, Rivoli

I used to teach math and physics to young students who train to become pilots, with a particular focus on trigonometry (route calculation) and dynamics of flight.

06/2012 - 01/2022

Journalist

Tagli Magazine, Torino (TO)

10/2010 - On Hold

Event Manager and Judge

Channel-Fireball Events & Others, Worldwide

Starting from 2010 I have been working as a Magic - The Gathering judge and event manager, reaching the highest possible certification level in 2016. I worked as an independent contractor and team leader for different tournament organizers in over 20 countries.

EDUCATION

Ongoing

Ph.D in Industrial Engineering

University Tor Vergata (Roma)

12/2016

Master's Degree in Physics

Università degli Studi di Torino

The curriculum is called "Astrophysics and Theoretical Physics", my thesis was an experimental setup of quantum optics which used a non-linear crystal to prove Bell's inequalities. Throughout my university career I focused mainly on quantum mechanics, quantum computation and quantum information theory.

02/2015

Post-graduate Master in Scientific Journalism and Science Communication

University School of Advanced Studies (IUSS), Ferrara

09/2009

Conservatory Degree in Piano

Conservatorio G.F. Ghedini, Cuneo

HOBBIES AND INTERESTS

Pro-nuclear Climate Activism

In April 2020 I started a nuclear advocacy and education project on Facebook, in the form of a page called "L'Avvocato dell'Atomo" (The Atom's Advocate/Lawyer), which quickly became the most important and sought-after source of informations about nuclear power for the Italian speaking public. In October 2020 we expanded on Instagram, then also on Twitter, TikTok and YouTube. Currently, a total of 17 people volunteer for the project, and 15 of them either have or are in pursue of a Master in either Physics or Nuclear Engineering. Currently, L'Avvocato dell'Atomo is the biggest nuclear communication project in the world, totalling more unique followers (above 200k) than any other project of the same kind, despite writing in Italian and not receiving any form of financing.

Martial Sports

I practiced Aikido for about 12 years, reaching the II Dan level.

Traveling

Probably my greatest passion; I developed quite a skill in finding the best quality/price combinations of flights to reach the farthest destinations.

Reading the News

I keep myself informed and engaged on international news, and I am a New York Times subscriber.
