

QA/QC Manager (Civil Works)

Qualifications & Experience

- Bachelor's degree in Civil Engineering or a related technical field.
- Minimum 15 years of QA/QC experience in industrial construction, EPC, data center, energy or similar large-scale projects, including at least 5 years in a leadership role.
- Strong knowledge of ISO 9001, Project Quality Plans, ITPs, method statements, NCR/CAPA processes and quality audits.
- Experience in supplier/subcontractor quality management, inspections, testing and project handover documentation.
- Strong knowledge of applicable European and Italian technical standards and regulations.
- Strong leadership, analytical, problem-solving and stakeholder management skills.
- Fluent English and Italian.

Key Responsibilities

- Implement and maintain the Project Quality Management System and Project Quality Plan.
- Ensure compliance with contractual requirements, approved drawings, specifications, procedures and applicable standards.
- Develop and monitor ITPs, quality procedures, method statements and inspection requirements.
- Coordinate site inspections, testing activities and third-party inspections.
- Manage NCRs, root-cause analysis and corrective/preventive actions.
- Plan and conduct internal, supplier and subcontractor quality audits.
- Monitor subcontractor and supplier quality performance.
- Ensure material approvals, traceability, test certificates and calibration records are properly controlled.
- Coordinate QA/QC activities with Construction, Engineering, Procurement, Commissioning, subcontractors and the Client.
- Ensure completion of quality documents, punch lists, as-built documentation and final handover records.
- Monitor quality KPIs and lead continuous improvement initiatives.
