

Site Civil Engineer

Qualifications & Experience

- Bachelor's degree in Civil Engineering.
- Minimum 5 years of site experience in industrial construction or large-scale building projects.
- Ability to read and interpret construction drawings, specifications and technical documentation.
- Good knowledge of construction methods and applicable European and Italian standards and regulations.
- Experience in subcontractor coordination, site execution and progress monitoring.
- Strong coordination, reporting and problem-solving skills.
- Fluent English and Italian

Key Responsibilities

- Supervise and coordinate daily civil and structural works on site.
- Ensure works are executed according to approved drawings, specifications, method statements and project requirements.
- Coordinate civil subcontractors, manpower, equipment, materials and work fronts.
- Monitor construction progress, productivity and resource requirements.
- Review drawings and identify constructability, technical and site coordination issues.
- Coordinate civil interfaces with Electrical and Mechanical teams and ensure work-front readiness.
- Coordinate with Engineering, QA/QC, HSE, Planning and Procurement teams.
- Monitor material availability and support timely delivery of construction materials.
- Support quantity verification and subcontractor progress measurements.
- Coordinate inspections and follow up punch-list items.
- Support civil works completion and project handover.
- Prepare daily and weekly construction progress reports.
